TERMS OF SALE

2% for cash with order
or 2% 10 days, 30 days net for established accounts.

Unless otherwise specified, Bulbs will be shipped when dug in the Fall. Approximate earliest delivery date is indicated for each variety.

We will accept orders for spring delivery provided they reach us not later than December 1. Spring orders will be placed in cold storage and shipped as directed at no extra cost until April 1. After April 1 a nominal charge will be made for storage.

All Bulb prices are F.O.B. Lake Grove, Oregon, and are subject to change without notice.

Our wholesale price lists are intended for the trade only. Kindly do not hand them to amateur growers.

In ordering please specify whether shipment is wanted via parcel post, express, or freight. If wanted by post kindly include postage with remittance.

In shipments of 100 pounds or more we find air freight rates to the principal cities cheaper than railway express or equivalent to motor freight rates. In many instances this may be your cheapest and fastest means of delivery.

We will accept Trade orders for direct shipments to retail customers at our regular prices for the quantities involved plus postage and a moderate packing charge. We suggest that such orders be accompanied by the seller's mailing labels properly addressed and such shipping instructions as may be needed.

Orders for growing crops accepted subject to crop failures, shortages, or other matters beyond our control.

Any claims for shortages or errors must be made within five days after receipt of goods as we will not be responsible after that time. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter in connection with the success of the seeds, bulbs or plants sold by us and will not be responsible in any way in cases of failure, other than to replace bulbs untrue to name. If the purchaser does not accept the goods on these terms, they are to be returned at once.

QUANTITY RATES ON LILY AND MISCELLANEOUS BULBS

25 Bulbs one variety and size at 100 rate.

250 Bulbs one variety and size at 100 rate less 10%.

Wholesale orders cannot be accepted for less than five bulbs of one variety and size except on items priced per each. Where so priced 1 to 25 bulbs will be supplied at the each price, 25 or more at single bulb price less 10%.

Flowering size indicates bulbs which will have flowered at least one season in our nursery. Large or 1st size bulbs are top size for the particular variety.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. In addition we grow moderate quantities of a number of other varieties and welcome inquiries concerning any which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions.

HIGHEST AWARD

LILIES

For Garden and Greenhouse

We are pleased to present to the horticultural trade our 1959 catalogue offering a most complete collection of Northwest grown hybrid and species Lilies, hardy Cyclamen, Erythroniums and other flowering bulbs and seeds. Twenty years have elapsed since we were awarded the gold medal at the San Francisco International Exposition and vast strides have been made during the intervening time both in the production of new hybrid lilies and in the improvement of our knowledge of the cultural requirements of the genus as a whole. The increased popularity of lilies all over the world is certainly indicative of the high esteem in which they are held by garden enthusiasts and is most encouraging to the growers who have spent the greater part of a lifetime producing them. Like a continued story, each year brings a new chapter with the flowering of exciting new hybrids and the perfection of improved cultural techniques. Future seasons are most certainly intriguing to look forward to.

On the following page are listed a number of new hybrid lilies which we are offering as our 1959 Introductions. These are all outstanding plants which have been thoroughly tested for several seasons since their first selection and we feel certain they will prove to be valuable additions to the list previously offered. The latter is most complete this year, containing a large selection of recent introductions along with earlier hybrids of unquestioned merit. Associated with us in the production of stock offered in this catalogue are growers of long experience including Mr. Carleton Yerex, Mr. John Shaver, Mr. Henry Eckstein, Miss Beatrice Palmer, Mr. Boyd C. Kline and a number of other specialists in this field. To Dr. E. F. Palmer we gratefully acknowledge the creation of many fine hybrids which we are now able to offer to the Trade.

Our list of Lily species has again been expanded to include several more of the rare and unusual for which we find a continued increase in demand. The greatly increased market for lilies in recent years, brought about to a large extent by the publicity accorded the many new hybrids available, has created a renewed interest in the species among serious garden enthusiasts. While it would be virtually impossible to offer every known species, we welcome inquiries for any not currently listed and we will gladly endeavor to secure them or suggest a source of supply.

For some years past we have been developing large stocks of hardy cyclamen and, from a small beginning, demand for these interesting and attractive plants has increased until they are now a major item with our trade. Due to an exceptionally good growing season our cyclamen stocks were never better, either for shipment as dormant corms in the summer or as growing plants during the balance of the year.

In conclusion, we suggest the possibility of extending the sales season for hardy lilies by offering them as growing plants during the spring and early summer. Many varieties can be successfully handled in this manner, by planting in pots or other containers during the late winter the bulbs will make just the right amount of top growth for rapid sale during the spring planting season.

1959 INTRODUCTIONS

L. AURELIAN HYBRID ALLICE—A large, smoothly recurving, pure white flower with soft apricot center. The plant is of graceful habit and rather shorter than the majority of the Aurelian group—4 to 5 feet being its ultimate height under normal conditions. Midseason flowering, late July to early August.

L. GREATHEART (Henryi x (Galahad x Aurelian))—An exceptionally attractive new hybrid with medium size flowers, wide open flaring type, slightly waved with gently recurved tips. The glowing flame orange base shades to deep cream at tips with orange brown anthers. The plant is very vigorous and strongly upright, growing 7 to 8 feet tall with glossy, dark green foliage and a wide pyramidal head of up to 30 blooms. Secondary buds give a full head of bloom over a long period. July flowering.

L. ORCHID LADY—A Martagon-Hansonii hybrid selection from the Painted Lady group, this is a most vigorous and free flowering clone carrying up to 50 flowers on 4 to 5 foot stems. The recurved flowers are orchid purple shading to pearl white at the center and dotted deep purple. An extremely hardy plant of easiest culture. Mid-June flowering.

L. REGINA—A new hybrid created by Dr. E. F. Palmer which has been awarded the Griffith Cup as the best seedling lily exhibited at the N.A.L.S. shows for two consecutive years, Ithaca 1957 and Toronto 1958. Of Aurelian origin, this lily carries very large flowers intermediate in form between trumpet and flare, a new graceful flower which is difficult to adequately classify. The color is a pure deep unspotted yellow with contrasting reddish brown anthers. The erect stems grow to 6 feet in height and the flowering season extends from mid-July to early August.

L. SILVER PRINCE—A late flowering hybrid from Dr. Palmer's Aurelian strain. The flowers are recurved, creamy white shading to light tangerine at base and tips of petals. The stems are vigorous and erect, rising to 6 feet with glossy deep green foliage. Secondary buds prolong the flowering season until late August.

L. SUNDANCE ((Henryi x Aurelian) x Sulphur Trumpet)—Large bowl-shaped auratum type flowers carried on strong, erect stems 5 to 6 feet tall. The color is a deep sulphur yellow at the tips shading to a lighter tone of the same color at the base. The flowers are unspotted and the reddish brown anthers produce a pleasing contrast to the bright yellow flowers. Late July to August flowering.

SALES AIDS

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies. Single copies are available to the wholesale trade at .85 each postpaid. Retail price 1.25. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering it in their catalogue listing lilies.

"Basic Lily Culture," our new pamphlet of information for both the novice and experienced grower, is designed to answer the questions most usually asked concerning the successful cultivation of hardy lilies and is based on over 25 years experience with the genus. Copies may be secured at a cost of 8 cents each in any quantity up to 100. We will be pleased to quote prices on larger quantities upon request. We feel that it will be of material benefit to the Trade to include these instructions with all retail lily orders, particularly to customers who have had limited or no experience in Lily culture. A successful beginning will most likely assure repeat orders in future years.

"Hardy Cyclamen Culture," a leaflet of complete instructions on growing these popular plants will be included with all cyclamen orders. Additional copies will be supplied at 7 cents each.

We will also include with each cyclamen order a copy of our new color display card. This card is designed to assist in the sale of these plants by mentioning their chief attributes in concise, quickly readable form. We suggest using the card with displays of cyclamen corms or plants either for nursery or counter sale. Additional copies are available on request.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 250 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2 1/4 x 3 1/4 and larger, or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.

LILY HYBRIDS

L. Aurelian Hybrids—Flower Types contained in this group comprise three distinct forms as follows:

CORONAS—Reflexed or recurved in varying degrees. Petals of medium width. Moderately tall plants producing flower heads excellent for cutting as well as garden decoration.

FLARES—Large, wide flaring flowers intermediate in form between Trumpet and Recurved. A very distinct flower type with a brilliant color range.

TRUMPETS—True Trumpet shaped flowers on medium to tall stems. The flowers are large and of heavy texture.

The above three Types are subdivided into select color strains as offered below. The color strains are carefully selected at flowering time to eliminate any off colors or inferior blooms.

In addition we offer several select clones in the Aurelian group and a strain of special select semi-bowl and semi-recurved types in pastel colors.

L. Ballerina —A new <i>Martagon-Hansonii</i> hybrid, distinctly different in flower type from others of this group. The flowers open flat and remain so until the petals fall, with no recurving except very slightly at the tips. The blooms are well spaced in a pyramidal head, producing an impression not unlike an oriental pagoda. Chrome yellow with a few maroon dots. Late June. 4 to 5 feet.			
Flowering size.....	2.50 each		Sept.
L. Brandywine —One of the new Beltsville hybrids. Large heads of outward facing flowers on 3 to 4 foot stems. Orpiment orange dotted oxblood red. Mid-June.			
Flowering size.....	9.40	75.00	Oct.

L. Cameo Hybrids —A new strain of hybrids derived from crosses of L. Auratum Platyphyllum and its variants with forms of L. Japonicum. Two distinct color groups have been selected in this strain, both of which carry large bowl shaped flowers. The Pink Cameos are entirely pink in varying shades with occasionally a few deeper pink dots toward the base of the petals. The White Cameos are pure white except for a faint suggestion of a gold band and occasionally a few pink or yellow dots in the flower throat. Both color strains are pleasantly fragrant. Height 3 feet. Flowering period late June to late July.

L. Centifolium, Temple Hybrids —A vastly improved strain of Centifolium Hybrids produced after many years of selective hybridizing. Offered only in color strains of selected plants (not clones) which are marked separately during the flowering season each year. The following color strains are available for the present shipping season:			
Amethyst Temple —Massive trumpets varying in color from light amethyst pink to deep columbine red. The pink coloring is on the interior as well as the reverse of the petals. Splendid for cutting or in the garden. In warm sections, planting in light shade is preferable to avoid bleaching. 5 to 7 feet. July.
